

JRCO Inc. has made a name for themselves by designing and engineering attachments to fit on most popular commercial mowers, walk-behind machines, and utility vehicles.

These lawn and landscaping attachments are easier to maintain, simpler to transport, and cost significantly less than stand-alone machines. JRCO offers attachments such as leaf plows, broadcast spreaders, aerators, and more. JRCO's most popular and versatile attachment is the Tine Rake Dethatcher.

JRCO's Tine Rake Dethatcher can be used year-round. The ultimate spring clean up tool: use after the first mowing of spring and remove thatch without damaging turf grass and leave behind a combed lawn. After a hot summer the Tine Rake Dethatcher can surface aerate soil to promote root development. You can also use the Rake over seed and accelerate germination. Finally, you can use the Dethatcher after the last mowing of fall to remove leaves and debris and leave behind a picture-perfect lawn.

The Tine Rake Dethatcher is a front-mount accessory that is available in 36", 46", and 60" width for your commercial walk-behind or riding mowers. Simply attach the Dethatcher to your **JRCO Mount Bar** and go!

Convenient lift handle reaches operator for simple adjustments or for going over obstacles like curbs. The double loop spring tines are simple to replace and the 12-gauge steel deck will withstand the elements.

To find out if the JRCO Dethatcher will fit your mower, check the JRCO **Mower Fit List**, call JRCO (800) 966-8442, or email JRCO at sales@jrco.com.

JRCO sells its products through a network of qualified dealers throughout the United States. If you are looking to purchase a JRCO attachment to add to your arsenal, find a dealer near you using our **Dealer Locator**.
