

# MORE SDCE 100 RECIPIENTS

## 21CC Education 21CC Education

Accelerate on-boarding through gamified mobile learning.

## 42Q Bloom Energy

Streamline and increase discrete manufacturing production capabilities using an AWS-based MES.

## 6 River Systems

### Lockheed Martin Corporation

Increase productivity, improve warehouse environment and implement order picking processes and technology.

## A. Duie Pyle

### Leading supplier of MRO products

Implement engineered integrated solution that blends resources in an efficient and cost-effective manner.

## ALOM

### ALOM

Integrate WMS for business intelligence-driven inventory management and demand planning to eliminate backorders.

## antuit.ai

### Largest global CPG bakery

Improve order accuracy to minimize waste without lost sales from understocking.

## APPLIED ACUMEN LIMITED

### Best Food Logistics

Transform service performance to survive.

## Asia Pulp & Paper (APP)

### Villa Chicken

Provide sustainable and cost-effective packaging solution that maintains quality standards.

## Asian Paints

### Asian Paints

Improve accuracy of its demand forecast.

## Avetta

### Global building solutions company and leading supplier of cement

Implement supply chain visibility system to identify and maximize use of compliant suppliers across business units.

## Blume Global

### OL USA

Deliver end-to-end visibility, alerts, reports and analytics to improve customer experience, drive value and grow client base.

## Bringg

### Planzer

Implement technology platform to produce further growth and improve shipper, customer, dispatch and driver relationships through digital transformation

## CAI International

### CAI Logistics

Prevent significant portion of dry freight container floor repair costs.

## CHEP

### Michigan Sugar Company

Help shelf-ready products meet new retail expectations while reducing labor costs and environmental impact.

## CMX (ComplianceMetrix)

### Restaurant Brands International

Provide single platform for vendor management, product life-cycle management and ensure ongoing product quality and food safety.

## Command Alkon

### Iowa Department of Transportation

Implement digital workflows to remove paper from business process to improve productivity.

## Crisp

### Nounos Creamery

Provide weekly demand forecasting to improve production process.

## Crown Equipment Corporation

### Lipari Foods

Determine appropriate design, racking and material handling equipment for new warehouse.

## CT Logistics

### Home Goods Company

Implement supply chain routing analysis technology to maximize lane effectiveness and transportation mode/lane selections.

## Demand Clarity Inc.

### Princess Auto Ltd

Transform supply chain to be driven by a forecast of consumer demand by item/store and/or item/selling location.

## Demand Management, Inc.

### Fast-growing consumer products company

Improve alignment of the company's production with today's market needs.

## Dematic

### Northern Cooperative Meat Company

Optimize distribution and dispatch process to address increased demand for Australian red meat

in the Asia market.

## dexFreight

### Freight Broker

Enable small freight broker to handle shipments in a logistics marketplace.

## DMW&H

### Conair

Build new multichannel facility with automation that will expand to fast growth.

## enVista

### Manufacturer

Develop a formal S&OP process and inventory strategy to enable to drive continuous improvement throughout the company.

## Esker, Inc.

### Lam Research Corporation

Provide solution for Lam's customer service center to help manage growing customer base and increased order volumes.

## Fictiv

### HEBI Robotics

De-risk supply chain through consolidation via Fictiv's global manufacturing ecosystem.

## Fine Tune

### Flint Group

Provide vigilant uniform category management.

## Flexport

### Flexport

Provide frontline responders with PPE to fight COVID-19 pandemic.

## FocusedBuyer LLC

### FocusedBuyer

Deploy real-time simulation solution that teaches students how to wisely spend money.

## Fortna Inc.

### L.L.Bean

Constrained warehouse capacity limited growth.

## FourKites, Inc.

### Land O'Lakes Inc.

Unlock unused freight capacity for more efficient operations.

## FutureSoft Business Consulting

### Juffali Automotive Company

Transform business processes and optimize system configuration to eliminate manual activities and operational roadblocks.

## GEP

### Leading financial services firm

This technology-led procurement and supply chain transformation project aimed to build agile function for greater savings and improved efficiency.

## HighJump

### Hunt Brothers Pizza/DBH Distributing

Future-proof operation and support organizational growth.

## Hyster Company

### New Belgium Brewing Company

Streamline keg line operation with lift trucks moving efficiently in tight spaces.

## iGPS Logistics

### Major beverage producer

Launch storage/transportation solution that streamlines supply chain automation, reduces costs, introduces efficiencies, enhances sales value proposition and improves sustainability.

## InfinityQS® International, Inc.

### Strategic Materials

Standardize quality data collection across 31 recycling plants to enable real-time process performance visibility, immediate issue detection/correction and cross-plant analysis.

## Insight Sourcing Group

### Footwear, sports and casual apparel company

Reduce SG&A expenses.

## Intelligent Audit

### PetCo

Optimize omnichannel fulfillment strategy that helps achieve cost-effective next-day ground footprint for all e-commerce orders.

## Ivalua

### Booking.com

Transform 16 years of procurement disconnect into business enablement and business partner service.

## Ivanti Wavelink

### J.J. Keller & Associates Inc.

Modernize warehouse environment by replacing legacy Windows-based devices.

## John Galt Solutions

### Combe Inc.

Implement Atlas Planning Platform to support S&OP globally.

## Kenco

### Walker Edison

New e-commerce multi-channel fulfillment center to be operational in 90 days.

## LeanCor Supply Chain Group

### BG Products Inc.

Assess key distribution processes and design new distribution center that enables productivity improvements.

## LevaData

### IBM

Deliver cognitive direct sourcing solution that achieves business-changing outcomes.

## Lineage Logistics

### Lineage Logistics

Create the cold storage warehouse of the future to maximize storage space, improve speed/efficiency and lower costs/energy use.

## Logility

### Bodybuilding.com

Optimize inventory planning and replenishment, focusing on assortment rationalization and promotion management.

## Logistical Labs

### LoadDelivered Logistics

Allow customers to choose their own rate and carrier when booking shipments.

## Lytix

### Cargo Transporters

Implement Lytix's driver safety program to reduce fraudulent claims, exonerate drivers and improve safety within its fleet.

## Material Handling Systems, Inc.

### UPS

Shift from older equipment to fully automated system with new sortation and conveyors.

## Mobilogix

### Enterprise Holdings

Tailor and implement patented telemetry solutions to improve operations and maintenance.

## mondCloud, Inc.

### TURVO Inc.

Onboard customers that use the Turvo platform.

## Newmine

### Omnichannel retailer of women's activewear

Enhance revenue and increase supply chain sustainability through disciplined returns reduction.

## NGC

### C&A

Implement platform for agile product development and faster speed-to-market.

## Nolan Transportation Group

### Crate & Barrel

Improve domestic OTR supply chain with focus on customer service, responsiveness, shipment visibility and on-time performance.

## NorthFind Management

### NorthFind Management

Combine behavioral economics with demand planning best practices to mitigate effects of biases and improve forecast accuracy.

## Novartis

### Novartis

Decrease transportation costs, IBC reduction, increase distilled solvent usage, labor saving improvements, waste solvent sales and tank farm optimization.

## Omnic, Inc.

### Global Shoe Company

Implement automated and intelligent demand planning and forecasting solution company-wide.

## Onfleet

### United Supermarkets

Boost delivery efficiency while maintaining stellar customer experience.

## Pace Harmon

### Global Private Equity Firm

Create and provide sourcing tools for value creation to portfolio company investments.

## PathGuide Technologies, Inc.

### Englewood Marketing Group

Integrate WMS and shipping system to add capacity to fulfillment operations.

## PINC

### The Chemours Company

Reduce costs and automate yard processes.

## Plantensive Solutions Group

### Shearer's Foods

Determine optimal manufacturing footprint and transportation network to serve demand at lowest cost possible.

## RateLinx

### Fortune 500 Electronics Retailer

Improve operational inefficiencies, optimize staffing imbalances and achieve accurate delivery times with end-to-end visibility.

## Redwood Logistics

### Taylor Farms

Loss prevention, increased productivity and visibility and improved trailer management capabilities and carrier partner satisfaction.

## Saddle Creek Logistics Services

### Happy Family Organics

Provide scalable fulfillment solution to accommodate exponential sales growth.

## SmartDrive Systems, Inc.

### Leavitt's Freight Services

Adopt video-based safety program to improve driving skills and protect fleet from legal liability.

## Soft Robotics

### NIBCO

Implement pick-and-place automation.

## Synergy North America Inc.

### PetFlow

Deploy flexible WMS to handle expansion down the road.

## ToolsGroup

### Franke

Improve forecast outcomes in multi-echelon environment and support inventory optimization and replenishments in locations without SAP.

## Transplace

### Transplace

Provide intelligence to improve transparency, reduce empty miles, cut waiting times and enable efficient end-to-end processes.

## UPS - Customer Solutions

### UPS Customer Solutions

Determine cost, service and GHG emissions levels of supply chain scenarios compared to current baseline supply chain.

## VAI

### Hardware and Lumber

Track store foot traffic and corresponding sales data to determine peak times and generated sales.

## Velociti Alliance North America, Inc.

### Volociti Alliance North America Inc.

Reduce labor cost and increase accuracy of high-demand, short fulfillment cycle items.

## Verusen

### Georgia-Pacific

Support initiative to reduce working capital, obtain inventory visibility and re-balance MRO inventory through a virtual network.

## XPO Logistics, Inc.

### XPO Logistics

Achieve supply chain efficiency by harnessing digital capabilities and data science.

## Yale Materials Handling Corporation

### Goya Foods

Decrease product touches and improve storage density using custom high-density racking system.

## Z5 Inventory

### Steward Health Care

Reduce cost of medical and surgical supply expiration.

## Zebra Technologies

### Saddle Creek Logistics Services

Enable omnichannel operations expansion with cloud-based WMS and integrated Android-based mobile computers.
